

UNIT 6

Embedded Figure

In such type of problem, a figure (embedded figure) (X) is given followed by four complex figures (a), (b), (c) and (d) in such a way that the figure (X) is embedded in one of them. The candidate has to choose one of these four figures and that figure is the answer.

Example 1. Figure (X) is embedded in any one of the four alternative figures. Find the figure that contains (X).

(X)

(a)

(b)

(c)

(d)

Sol: Carefully observing the Fig. (X) and the four alternative figures, we see that the embedded figure is (b).

Example 2.

(X)

(a)

(b)

(c)

(d)

Sol: On very close observation we find that Fig. (X) is embedded in Fig. (b).
Hence, the answer is (b).

EXERCISE

Directions: A Fig. (X) is given, followed by four complex figures in such a way that Fig. (X) is embedded in one of them. Choose that one.
